

would like to "scrub" the following website to locate available campsites.

<https://reserve.floridastateparks.org/Web/#>

The screenshot shows the 'Camping and Lodging' search interface. It includes a 'Park or City Name' field with 'Highlands Hammock State Park' selected, an 'Arrival Date' field with '06/04/2021', and a 'Stay Length' dropdown set to '7'. There is a 'Search' button. Below these are 'Optional' filters: 'Camping' (selected), 'RV/Motorhome', '> 30', and a 'Unit Type Filter' dropdown which is highlighted with a red dashed box.

The search results are given like this:

The screenshot displays the search results for 'Highlands Hammock State Park'. On the left is a sidebar with filters for 'Camping', 'RV/Motorhome', '> 30', and a 'Unit Type Filter' with checkboxes for 'Select All', 'Astronomy Pad', 'Dry Camping', 'RV or Tent' (checked), 'RV/Trailer Only Site', and 'Tent Only'. The main content area shows the park's details, including a photo and a description. Below this is a 'Nearby Parks' section listing 'Kissimmee Prairie Preserve State Park' (31 miles away). On the right is a table of available campsites:

Facilities	Unit Type	Status
Loop ELE2 ELE2	RV or Tent	Reserve
	Tent Only	Check Availability Notify Me!
Loop ELEC ELEC	RV or Tent	Reserve
	Tent Only	Reserve
Loop WILD WILD	Tent Only	Reserve

A red line connects the 'Reserve' button for the 'Loop ELE2' site to the text below.

If the result is "Reserve", I would like to be notified via sms or Telegram

The parameters which I must specify are the following:

Park Name

Arrival Date

Stay Length

The optional fields are not necessary.

I would like to have an option to search multiple parks.
